

Proficiency testings & reference materials cosmetic (chemical – physical analysis)

Quality assurance program cosmetic

Through our effort to constantly develop and provide customized services to our clients, we have established ourselves in the last years as main contact for the external quality assurance (proficiency tests and reference materials) in the field of commodities.

Today we will introduce you our accredited proficiency testing scheme for chemical and physical analysis of cosmetic products.

In the first step following proficiency tests and reference materials are available:

- ▶ **Soap:**
Organically bound halogens (September 2014)
- ▶ **Care products :**
Antidegradant (October 2014)
- ▶ **Shampoo, Lotion:**
Chemical parameters, fat, pH-value, urea etc. (August 2014)
- ▶ **Cream, Lotion:**
Vitamins (September 2014)
- ▶ **Dental care:**
Fluoride (October 2014)

This program complements our already established microbiological cosmetic proficiency tests.

For more information and our complete program, please visit our website at www.drrr.de „catalogue“.

Your benefit:

- ▶ Significant increase of your laboratories performance and quality
- ▶ Faster development of your laboratories performance and quality
- ▶ Saving on the costs of development and maintenance
- ▶ Saving on the working time
- ▶ Reliable external presentation towards costumers, authorities and certification bodies

Have we sparked your interests?

Do you have suggestions for other parameters or matrices and their implementation?

Then don´t hesitate to contact us!
