

new proficiency testing schemes in the year 2017

Dear customers

Through our further development in the scientific fields, we established several new proficiency testing schemes and reference materials in our new product catalogues for the year 2017 / 2018. We are very pleased to present you our innovations:

Innovations in the product catalogue food and feed:

New proficiency testing schemes in the chemical-physical field:

- **two new proficiency testing schemes in the field of milk and cream**
(buttermilk, dairy drinks)
- **one proficiency testing scheme in the field of milk powder**
(milk powder 3 – bulk density)
- **one proficiency testing scheme in the field of fruit and vegetables products**
(hot sauce)
- **one further proficiency testing scheme in the field of meat products**
(vegetarian sausage substitute)

New proficiency testing schemes in the microbiological field:

- **several new proficiency testing schemes in the field of drinking water**
(E.coli drinking water, Coliforme bacteria drinking water, aerobic total count drinking water, Enterococcus drinking water, Ps. aeruginosa drinking water, identification of germs drinking water)
- **some new proficiency testing schemes in the field of surface- and waste water**
(E.coli / Coliforme bacteria surface- and waste water, Enterococcus surface- and waste water)
- **further new proficiency testing schemes in the field of mineral water and table water**
(aerobic total count mineral water and table water, streptococci (faecal) mineral water and table water, E.coli / Coliforme bacteria mineral water and table water, Pseudomonas spp. mineral water and table water))

New proficiency testing schemes in the organoleptic field:

- **one new proficiency testing scheme in the field of non-alcoholic beverages**
(fruit juice (threshold value examination, flavour taint))
- **further proficiency testing schemes in the field of alcoholic beverages**
(wine (simple descriptive testing), wine (profile testing))
- **some new proficiency testing schemes in the field of other food matrices**
(chocolate (simple descriptive testing), chocolate (profile testing))

Innovations in the product catalogue food / feed safety parameters and adulterants:

New proficiency testing schemes in the chemical-physical field:

- **two new proficiency testing schemes in the field of cereals / cereal products:**
(cereal / cereal products – glyphosat, rice wafers)
- **one proficiency testing scheme in the field of fruit and vegetables**
(orange juice - Carbendazim)
- **one further proficiency testing scheme in the field of GMO**
(soy (GMO))

Innovations in the product catalogue building material:

New proficiency testing schemes in the microbiological field:

- **new proficiency testing schemes in the field of other building materials**
(moulds (contact samples), moulds (material samples))

Have we sparked your interests?

More information about our proficiency testing scheme and reference material you can find in the product catalogues on our website <http://www.drrr.de/en/catalogue/> and in ODIN odin.drrr.de

For questions and suggestions do not hesitate to contact us!

Yours DRRR-Team
